

A NEW PARLIAMENT FOR A NEW EUROPE

Strasbourg, Tuesday 2 July 2019

The newly elected Europe Parliament should become the front-runner in promoting a new Europe: **a more united, more democratic, more social, sovereign and federal Europe!**

Radical reforms of the Euro, a security and defense union, a comprehensive plan against climate change, a true European democracy are urgently needed but constantly postponed. Meanwhile nationalism is on the rise, and citizens are puzzled on what Europe brings to them and where it is heading to. The European Union is stuck in a dangerous status quo that could well be its downfall. **European solutions are needed urgently, and they can only go hand in hand with the transformation of the EU into a federal Union.**

The Members of the European Parliament should **choose Europe**, wholeheartedly and without reservations, over their national interest. **The European Parliament to take the initiative of reforms and become the driving force to change Europe.**

Join the cross-partisan **Spinelli Group** gathering federalist-minded members of the European Parliament and join the European Federalists if you want to support the cause of a united and federal Europe.
