EUROPEAN FEDERATION

Now!

War has returned to blood our continent.
Peace, freedom, democracy are threatened everywhere in the world.

On an economic level, a great effort of investments and adequate political interventions in strategic sectors are urgently needed to guarantee fair development.

Only united as Europeans can we think of facing all these challenges. But we need the European Union to become much more supportive and capable of acting.

THE EUROPEAN PARLIAMENT IS WORKING IN THIS SENSE.
It has developed, and will vote by the end of November, a proposal to reform the Treaties capable of making the European Union a true federal political union, which will be able to act effectively in all those fields in which common action is needed.

We support this attempt by the European Parliament. We ask the Government, the national Parliaments and the political forces to support the request of the European Parliament and to stand in favor of the reforms necessary for the birth of a federal, sovereign and democratic Europe.

Make your voice heard as a European citizen!

Have you heard about the European Parliament's proposal for a federal reform of the EU Treaties?
